4. Click on a request
5.  View details

## PASSWORD POLICY

All test accounts use simple passwords for development:

- Admin: `admin123`
- Farmers: `farmer123`
- Professionals: `professional123`
- Volunteer: `volunteer123`

## For Production:

- Change all default passwords
  - Implement strong password requirements
  - Enable email verification
  - Add 2FA for admin accounts
- 

## QUICK LOGIN LINKS

**Admin Dashboard:** (<http://yourdomain.com/login>) → [admin@farmvax.com](mailto:admin@farmvax.com) / admin123

**Farmer Dashboard:** (<http://yourdomain.com/login>) → [farmer@farmvax.com](mailto:farmer@farmvax.com) / farmer123

**Professional Dashboard:** (<http://yourdomain.com/login>) → [professional@farmvax.com](mailto:professional@farmvax.com) / professional123

**Volunteer Dashboard:** (<http://yourdomain.com/login>) → [volunteer@farmvax.com](mailto:volunteer@farmvax.com) / volunteer123

---

## ROLE-BASED REDIRECTS

After login, users are automatically redirected:

- **Admin** → (</admin/dashboard>) (Purple theme)
  - **Farmer** → (</farmer/dashboard>) (Green theme)
  - **Professional (Approved)** → (</professional/dashboard>) (Teal theme)
  - **Professional (Pending)** → (</professional/pending>) (Waiting page)
  - **Volunteer** → (</volunteer/dashboard>) (Green theme)
- 

## VERIFICATION CHECKLIST

- Admin can login and access dashboard
  - Farmer can login and see livestock
  - Approved professional can access full features
  - Pending professional sees pending page
  - Volunteer can access enrollment features
  - Each role redirects correctly
  - Sample data appears in dashboards
  - Service requests are visible
  - Vaccination records show up
- 

## TROUBLESHOOTING

### Can't login?

- Check database was seeded: `(php artisan db:seed)`
- Verify user exists: `(SELECT * FROM users WHERE email = 'admin@farmvax.com');`
- Clear cache: `(php artisan optimize:clear)`

### Wrong dashboard?

- Check LoginController redirects
- Verify user role in database
- Check middleware on routes

### No sample data?

- Re-run seeder: `(php artisan db:seed --class=DatabaseSeeder)`
  - Check relationships in models
  - Verify foreign keys in database
- 

All credentials ready for testing! 

Use these accounts to test every feature of your FarmVax platform!
